

Internal Claims Batch Assessment Brief

Classification: synthetic anonymous test evidence only.

Scenario folder: 02-internal-claims-batch

System summary: Private claims adjudication batch estate processing nightly policy and claims files inside isolated back-office networks.

Key crypto and protocol terms: RSA-3072, 3DES, SHA-1, AES-256, ML-DSA

Expected scan behavior: Medium or high remediation driven by RSA-3072, 3DES, and SHA-1, but not internet-edge critical because artifacts repeatedly state private, internal, offline, and batch.

Use architecture-diagram.png and process-flow.png for visual/OCR topology and flow extraction.

No organization branding, real product names, credentials, private keys, payment tokens, PINs, account numbers, customer data, or live infrastructure references are included.
